JOHN HULL

Maple Financial Group Chair in Derivatives and Risk Management,
Director, Centre for Finance, and Professor of Finance

An internationally-renowned authority on derivatives, Prof. Hull's teaching and research interests cover all aspects of financial engineering including market risk, credit risk, executive stock options, volatility surfaces, interest rate derivatives, and numerical procedures for valuing derivatives. He is the author of two popular books widely used in trading rooms around the world, *Options, Futures and Other Derivatives* (now in its sixth edition), and *Fundamentals of Futures and Options Markets* (now in its fifth edition). Both titles have been published in many different languages. Prof. Hull has won many teaching awards, including the University of Toronto's prestigious Northrop Frye Award for successfully linking teaching and research.

PhD, Cranfield University; MA, Lancaster University;
MA, University of Cambridge; BA, University of Cambridge

"Rotman has one of the most highly-regarded finance groups in the world. The School's presence in North America's third-largest financial centre facilitates access to finance sector leaders who fund Rotman research, and mentor and hire students. The introduction of Integrative Thinking concepts — moving beyond traditional silos such as Finance — creates unparalleled advantages for a Rotman MBA over other North American business schools."
