Errata

1. P.543, line 9: x should be z.

2. P.545, last equation: $\sigma^{\frac{s}{2}}$ should be σ^s.

3. P.546, line 3: $t = [\min[s_1, s_2]/2]$, the integral part is missing.

4. P.546, last equation should read

$$\mu_{s_1,\ldots,s_n} = (s_1 - 1)\sigma_{11}\mu_{s_1-2,\ldots,s_n} + \sum_{i=2}^{n} s_i\sigma_{1i}\mu_{s_1-1,s_2,\ldots,s_i-1,\ldots,s_n}.$$

   The left hand side of the equality is missing.

5. P.548, footnote 5: $\kappa(r)$ should be

$$\kappa(r) = \left(\frac{k}{2} - 1\right)^r \Big/ \left[\left(\frac{k}{2} - 1\right) \cdots \left(\frac{k}{2} - r\right)\right] - 1.$$

   There is a missing -1 in the original equation.

6. P.548, Proposition 3: $\kappa(0)$ should be defined as 0 instead of 1.

7. P.550, 14th line from bottom: $s_1 = s_2 = \cdots = s_p$ should $s_1 = s_2 = \cdots = s_p = 1$.
